Target role: AI-native Product Manager / Product Builder

Summary

AI-native product builder: Senior PM shipping LLM products to enterprises, founder, and hands-on prototyper with a public GitHub. Strong in vertical/industrial software (ERP, asset management) plus GenAI.

Experience

Senior Product Manager — MariApps Marine Solutions (Jan 2026–present)

- Own LLM products serving ~80 enterprise customers in maritime ERP; roadmap, specs, evals, rollout.
- Prototype AI features myself with AI coding tools; bridge domain experts, data and engineering.

Founder — OceanAI (~20 people)

- Founded OceanAI (~20 people); built WhatsPAL, a conversational front end to maritime ERP.

SpecTec — maritime asset-management software (product/domain role)

- Worked on ship maintenance/ERP software; deep understanding of enterprise B2B buyers and fleet operations.

Earlier: Marine engineering background; 5 years of Power BI analytics/reporting.

Shipped on GitHub (hands-on builder proof)

- claude-parcel-intake-evals — LLM evaluation harness for a parcel-intake workflow.
- parcel-pickup-optimizer — optimization/agentic workflow demo.
- acuitygen / insightcanvas — AI-generated insights / analytics canvas.
- society-assistant-demo — conversational assistant for housing-society operations.

Skills

GenAI/LLM product · agents & evals · ERP / asset management / industrial software · BI (Power BI 5y) · vibe coding · enterprise B2B
